About us

Z-Industries was incorporated on 2019, by a team of eminent & most dedicated located just near Coimbatore, known as Manchester of South India, a prominent internationally acclaimed textile city in Tamil Nadu. Also our project is situated in a half an hour driving distance to Tiruppur, a Dollar of Tamil Nadu.

What is uPVC?

uPVC, is a specially engineered compound created nearly 30 years of intensive research and development, uPVC has become the primary substance in the manufacture of windows, doors and others building materials in the construction industry. Researchers and scientists emphasize that, in all likelihood, there will not be another compound in the near future with better standards of durability and overall performance in outdoor commercial application products.

ADVANTAGES

The smooth silky finish is non-porous and virtualy requires no maintenance other than a wipe clean with a damp cloth.
All corner joints are welded and fully water tight.
uPVC needs no painting or staining even when a surface foil is applied to provide a colored or wood grain effect.
All hardware, gaskets, weather-strips and glazing can be easily replaced without removing the frame from the structure.
Manufactured using a self-extingusing uPVC material for safety in case of fire.

DURABILITY

uPVC frames do not rot, rust or corrode and as it does not absorb moisture, it will not wrap, twist or split. Impact modified uPVC is treated with special additives making it extremely tough and durable.

Insulation

uPVC Frames have high thermal and acoustic insulation performance. Which can further be enhanced using special sealed glass units.

COMBUSTION RESISTANT

uPVC Frames will only burn when deliberately subjected to an external heat source. Once the heat source is removed the flames will automatically extinguish.

DESIGN CAPABILITIES

Any array of the most existing and traditional styels can be reproduced using uPVC window designs.

ENVIRONMENT-FRIENDLY

uPVC frame materials arc absolutely recyclable, energy efficient and have no adverse effect on the rainforests.

COST COMPETITIVE

uPVC windows and doors are both long lasting and virtually no maintenance making it the most cost-effective choice of material for builders.

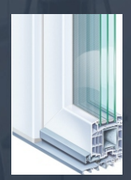

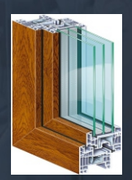

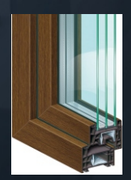

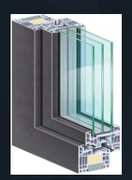

RAW MATERIALS

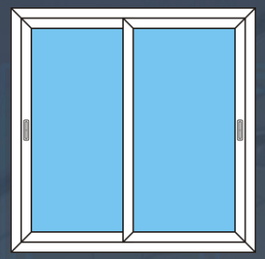

Profiles: AS we used Top Branded of European Standard ISO Quality Profiles Only We can use.
HLL SPECIALITY PROFILES (A Group of AMD OVERSEAS)

Hardware: DNV Global India Pvt Ltd., Delhi. ISO Standard Quality Hardware Only we can use.

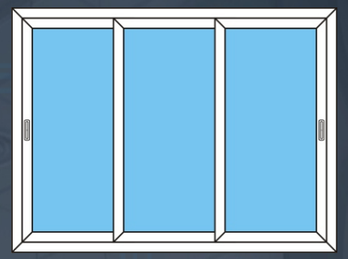

Glass: Saint Gobian India - Plain, Pinhead & Design Glasses

STEELS: Essar Steel - Reinforcement Steel
